

The Gladiator Custom Mouthguard Makes All The Difference

Many people think all mouthguards are the same. They are not. There are currently three categories of mouthguards available: stock or ready-made, mouth-formed (commonly known as boil & bite), and custom-made. Although all three provide protection, they differ in the amount of protection, comfort and cost.

The Stock Mouthguard

- Purchased at most sporting goods stores
- Least expensive of the three categories
- Little can be done to adjust the fit or comfort
- Interferes with breathing and speaking since jaw must be closed to keep it in place

The Boil & Bite Mouthguard

- Purchased at most sporting goods stores
- Relatively inexpensive
- Forms on teeth with use of fingers, tongue and biting
- Decreased protection if mouthguard was bitten into too hard while forming
- May be loose-fitting due to improper forming
- Bulky size frequently interferes with breathing and speaking

The Gladiator Custom-Made Mouthguard

- The American Dental Association advises that a custom-fitted mouthguard is the best protection against dental injury and concussion
- The Academy of Sports Dentistry states a custom mouthguard is 1,000% more protective than any other type
- Individually made to fit your teeth and mouth
- More secure and comfortable than other mouthguards
- Same quality, but less expensive than ordering from your dentist
- Free-Flow™ system enhances performance
- Lasts longer than other mouthguards
- Personalize with choice of colors plus add your name or other identification to prevent loss
- Ideal for every sporting activity
- Comes with case

Here's what athletes and parents say about their Gladiators...

"It was the easiest and the best purchase I have ever made. My son loves your product. It's the only mouthguard that he hadn't complained about..."

Alexis H. Patchogue, NY

"The mouthguard fits perfectly. To think that my dentist was going to charge me \$300 for a molded mouthguard. Great work and thank you very much."

Danny F., Ithaca, NY

"I just wanted to let you know I received my Gladiators and they fit amazing. Thanks for the awesome service."

Adam L., BC, Canada

"I have participated in sports my whole life and have tried all the mouthpieces out there. Your product is far superior to any boil and bite mouthpiece."

Tom B. Plantation, FL

"The turn around time from order to receiving your product was very fast. It fits perfect ... Forget the boil mouthguards that don't fit and by the time you buy a couple of them, you could have had the real thing!"

Ron D. M., MI

"I love my Gladiator because it fits so tight I can drink from my water bottle without having to take it out."

Phillip J., Malvern, PA

"Super service on top of the best mouthguard made...that's how to run a business!" Thank you

Daryl E., Lancaster, PA

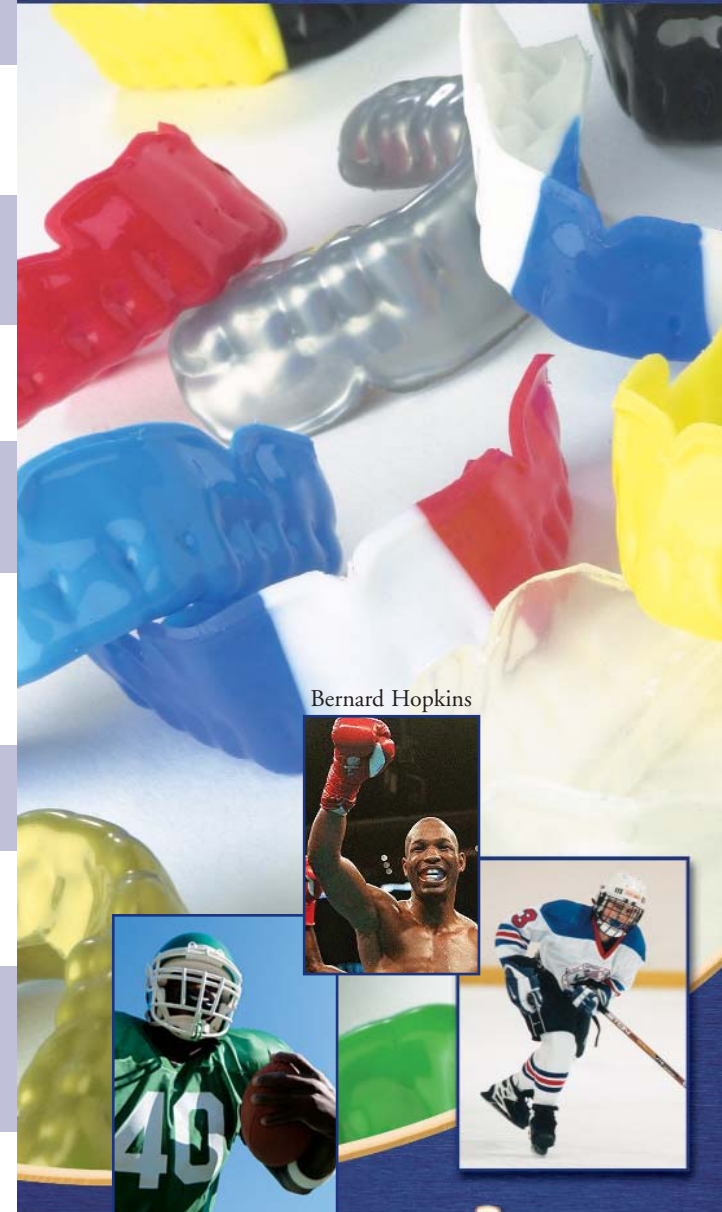

"PS: She says it's the best mouthguard she ever had. She can talk clearly to her teammates in the heat of battle without having to worry about it falling out. Top athletes like her are better able to concentrate on their game without another distraction and reason not to communicate."

"I just wanted to thank you for the best product I have ever tried!!! This is a fantastic product! It fits perfect, stays in place during the whole game and is just an all around wish come true!! I was so pumped up to wear it in my first game that I felt like it made me have the best game I have ever played!!! Thank you"

Carolyn L. G, Midlothian, TX

Custom Mouthguards

*Serious equipment
for serious athletes*

Over 5 Million Teeth Are Knocked Out Every Year

Sports are a major cause of missing teeth and other dental injuries. Many of these injuries could have been avoided if the athlete had been wearing a properly-fitted mouthguard.

Athletes choose not to wear a mouthguard for many reasons including lack of comfort, speech impairment and breathing problems. Sport Guard International (SGI) has created the Gladiator, a dentist's quality custom-fit mouthguard. The Gladiator is changing an athlete's awareness of protecting their teeth and their winning smile by softening and dispersing impact that could otherwise cause broken teeth, face or jaw injuries. It may also reduce the severity and incidence of concussions. A mouthguard is an important piece of equipment. The Academy for Sports Dentistry states a custom mouthguard is 1,000% more protective than any other type of mouthguard.

The Gladiator is a form-fitted, heat and pressure laminated mouthguard that is fitted precisely to the athlete's teeth offering better protection against oral injury and even concussion.

The Gladiator features the innovative Free Flow™ system which enhances athletic performance with easier breathing and clearer speech. The streamlined design is more comfortable than ordinary "stock" or "boil and bite" mouthguards currently available in stores.

The Gladiator is fabricated in a USA based professional dental laboratory by trained technicians. Additionally, all materials used in the fabrication of the Gladiator are made in the USA.

For years, SGI has been making custom mouthguards for dentists, Division I, II, III collegiate athletes and professional athletes.

Because of the superior custom fit, an athlete is more likely to wear the Gladiator.
Because of the superior quality, an athlete will be better protected against dental injury.

Gladiator Impression System

Previously, an athlete would have to visit a dental professional to purchase a custom-fitted mouthguard of this quality. The Gladiator's revolutionary Impression System omits the need for a dental visit. Just follow a few simple steps and you are on your way to wearing the most protective mouthguard available.

The Process Begins With an Impression of YOUR Teeth.

After placing your order you will receive a kit containing the Gladiator Impression System which will enable you to make your own impression of your upper teeth. Included in your kit is the following:

- Easy to follow instructions insuring success.
- Personalization form- all personalization is FREE.
- Professional dental impression material.
- Professional dental impression trays .
- Actual sample of a good impression again, insuring success.

Return your impression to SGI and your custom-fit Gladiator will be shipped to you in a few days.

Gladiator Free Flow™ System

Sport Guard International has designed the Gladiator mouthguard with the unique and innovative Free Flow™ system which enables easier breathing and speaking with the mouthguard in place. A Gladiator is designed for your specific sport by using SGI's layering process to remove bulk without compromising protection. The Free Flow System creates optimal air flow. Athletes feel less fatigue and performance will be enhanced. Additionally, this system offers clearer speech allowing better communication.

Which Gladiator is Right for You?

When choosing your Gladiator Style please note the thickness of your Gladiator has more to do with the level of play, NOT the size of your mouth. A Gladiator is fabricated on the model of YOUR mouth, therefore it will fit YOUR mouth perfectly.

3 Gladiator Styles to Choose From

GLADIATOR JUNIOR – Fabricated with 1 layer of 3 mil EVA material. Recommended for children who still have a majority of primary or "baby" teeth. Or for wrestlers who need a lower guard to cover braces. (*Customization not available.*) *This guard is NOT recommended for children who are over 8 years old.*

GLADIATOR PRO – Fabricated with 2 layers of 3 mil EVA material. Recommended for all sports from non-to-heavy-contact, and athletes who wear helmets and face protection, even at the highest level of competition.

GLADIATOR ELITE – Fabricated with 2 layers of 3 mil EVA material with an extra 2 mil layer for added protection. Offers the best protection for heavy contact sports, athletes who DO NOT wear face protection or have suffered from a SEVERE concussion.

You must be at least 14 years old to wear this type of mouthguard.

Gladiator Upgrade Options:

You can enhance the Gladiator Pro and Elite styles with the following upgrades:

RAPTOR – Recommended for "Chewers". This is a material upgrade for the Pro Style ONLY. The material is denser, not thicker. Allowing for better "chewing" resistance without sacrificing comfort.

COMBAT – Recommended for MMA and Boxing. Available on the Pro and Elite styles. This guard is specifically designed for very high impact sports. It is an additional 3 mil of EVA over your molars. Giving you the option for an imprint of your lower teeth to be made to lock your lower jaw without closing your breathing space.

The Gladiator is available in three styles and a wide variety of colors so you can match your team colors or personality. Please go to our web site for a full color selection. Plus you can personalize your Gladiator to include your name/number and logo. All personalization is FREE! SGI offers team, school and group discounts.
